

DOUBLE DUTY™ DIFFUSERS – FABRIC WRAPPED

Polycylindrical (barrel shaped) diffusers will act to scatter sound in any location. Bass absorption will vary with size. A 2' X 4' has maximum absorption at 125 Hz. Increasing size to 4' X 8' lowers the point of maximum absorption to 63 Hz. Mid to high frequency absorption is typically 0.10 to 0.25.

Construction: Class A Thermoformed plastic, covered in acoustically transparent, Guilford of Maine® FR701® Style 2100 fabric

Nominal Sizes: 2'x2', 2'x4', 4'x4' and *4'x8' (Molded Fiberglass only, not Thermoplastic). *Other sizes are available, please inquire for more information.*

Depth: 7"

Mounting: L-Bracket for direct mount to wall/ceiling – **OR** – Manufactured to fit into standard T-bar grids.(15/16")

The internal cavity of the Double Duty Diffuser can be lined with a 1½" thick layer of glass fiber batting to increase absorption and prevent resonance (denoted "w/ insulation" in data table).
